SOLUS™ patient gowns

the perfect balance of comfort & dignity

The Solus patient gowns were developed using the latest in textile technology to enhance patient care while maximizing efficiencies and reducing costs.

The gown closures have Konnect™ snaps made of plastic specially designed and recognised for their durability.

Patient care gowns

THE BENEFITS

Comfort & softness

50% softer on the skin compared to traditional woven gowns.

Moisture wicking

Moves moisture away from the body for patients to stay cool and dry.

Dignity & coverage

Full wrap around design helps patients maintain independence and privacy.

Easy to process

40% faster dry time than traditional gowns. No ironing or folding required.

Long lasting

Superior polyester fabric that is fade resistant and offers improved stain release.
